We are trying to give you a way to download this movie. Q: Is it possible to call \$.each from a different scope? I am having trouble calling \$.each in a different scope. It works fine if I put it directly after I fetch the data from the db, but fails miserably if I put it in a function. The error I get is 'Uncaught TypeError: Cannot read property 'each' of undefined'. Here is my code, my apologies for the mess. It's quite a big function. The 'you have to show' has been removed as it is irrelevant.

```
function fetchFeeds() { var text, feed, feeds, i, len; text = $('#text').val(); feeds = text.split(','); feeds = $.map(feeds, function(item) { 82157476af
```
